

Welcome to ce | de | pa

Cinco anos de inovacao

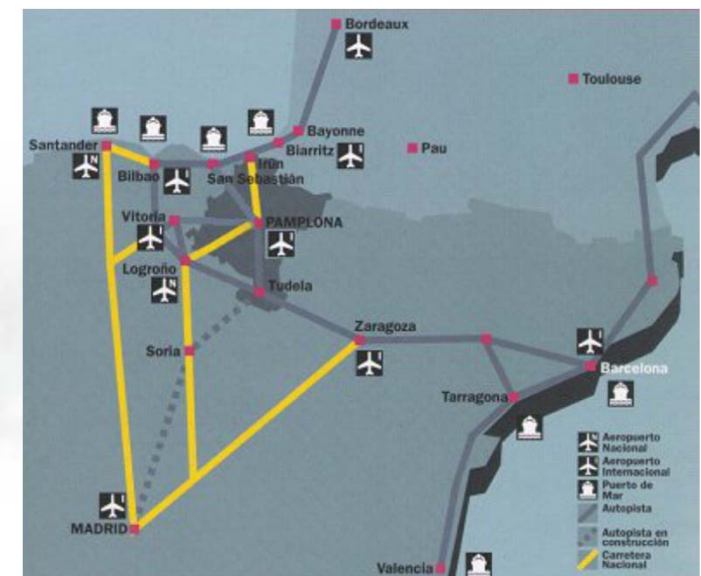

What is ce | de | pa ?

Ce | de | pa is a **Saip** and **Dow** joint investment for an industrial scale technical center **unique in the world**, fully dedicated to the research and development of new solutions for the worldwide manufacturers of polyurethane-made panels for thermal insulation using the continuous manufacturing processing technology.

Where it is located and how to get there

Pol. Ind. La Serna,
C/I-2A
31500 Tudela,
Navarra - Spain
Tel/Fax +34 948415762

Logistic

Pol.Ind. La Serna, C/I-2A
31500 Tudela, Navarra
Spain

Nearest airports :

- Zaragoza approx 80 km
- Bilbao approx 200 km
- Barcelona approx 250 km
- Madrid approx 380 km
(fast speed train
approx 2 hours to Zaragoza)

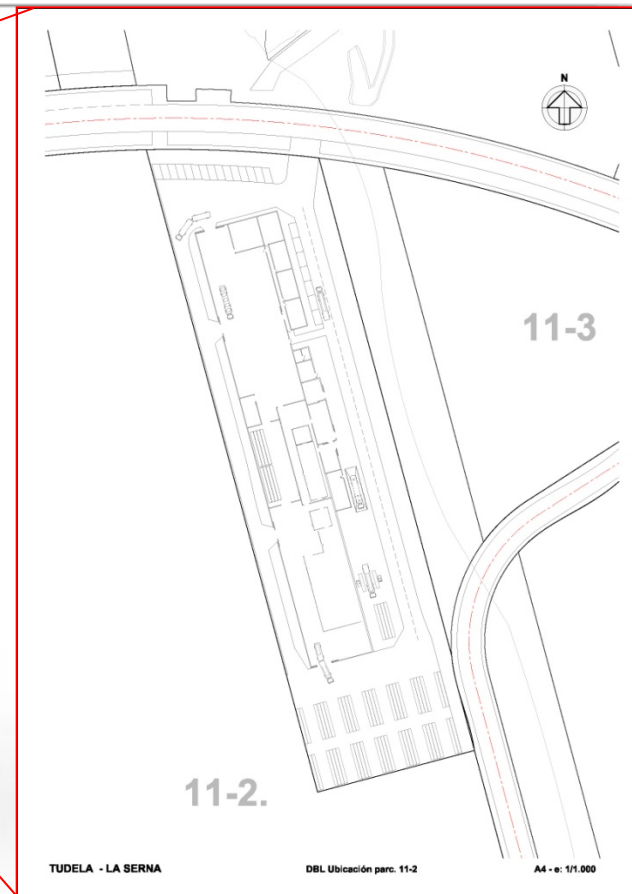

Hotels/Tudela

- Hotel Tudela Bardenas
- AC Hotel Ciudad de Tudela
- NH Delta

Base 504977 (546706) 3-82

Total land plot area : 11.731 m²

Why ce | de | pa ?

- To accelerate the updating of the existing processing technology
- To develop new processing methods
- To introduce new processing equipment
- For training courses
- For test , trials and prototyping
- For technical support for products certifications

The Industrial scale laboratory equipment

Line features

- Roll forming section for corrugated and flat steel facings profiles
- Multi stream dosing unit
- Press conveyor with operating temperature up to 70 °c
- Thickness range up to 220 mm
- Handling section complete with packaging and cooling equipment
- State of the art line process control and supervision system
- Feeding of various pre-cut insulating materials and facings
- Primer equipment for steel facings treatment
- Gluing equipment for pre-cut materials

Line total length 120 meters

Roll forming section for corrugated and flat steel facings profiles

Multi stream dosing unit

Press conveyor with operating temperature up to 70 °c

ce|de|pa was an idea and now is a reality

After the two inauguration events which have witnessed some customers and politicians participation

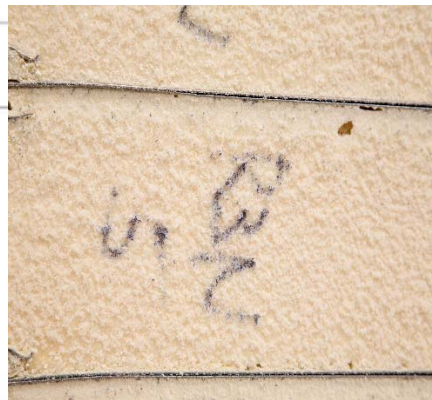

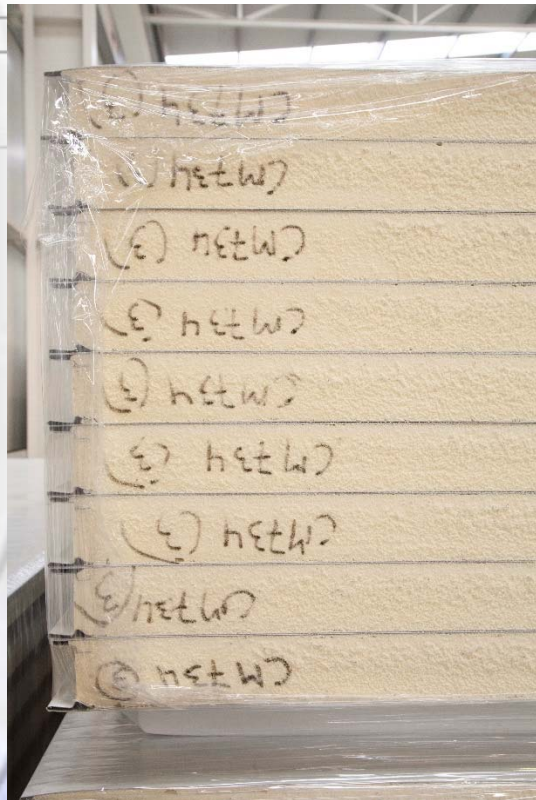

ce | de | pa was an idea and now is a reality

Ce | de | pa daily processes raw material trials

ce|de|pa was an idea and now is a reality

Always looking for innovative solutions

ce | de | pa was an idea and now is a reality

**A very well equipped lab is ready
at disposal for
post production testing**

ce | de | pa was an idea and now is a reality

A meet up between the customers and the suppliers

ce | de | pa was an idea and now is a reality

it's structured to be a training center for the technicians and operator in the application field

SAIP a company made of people.
